NiceLabel

the professional
labeling software

For SAP-run businesses who need to print labels directly from SAP® applications, NiceWatch Enterprise Business Connector is a certified device controller that directly connects to your data and prints it on any label printer.

Eliminating the need for programming, NiceWatch Enterprise Business Connector allows you to quickly choose your label design and then print the label exactly as you wanted it.

DESIGN A LABEL IN MINUTES, CLICK A BUTTON IN SAP, AND NEVER WORRY ABOUT IT AGAIN

- Built-in compliance with most barcode and RFID standards
- Compliance with numerous industry standards
- Complete printer model independence
- Easy to use and maintain, consuming less time and effort to run
- Transparent system with a graphical designer
- Intuitive document design GUI
- No compromise on performance compared to complex internal solutions

YOUR TIME, BUDGET, AND KNOWLEDGE ARE AS VALUABLE TO US AS THEY ARE TO YOU

Move beyond the constraints of complicated and cost-intensive labeling operations, that limit your flexibility and efficiency. Tackle the labeling system from within, using the stable and powerful SAP platform in combination with a straight-forward and user-friendly device controller to receive the best possible labeling results in the shortest time.

GRAPHICAL DESIGNER

The costs and delays of manual coding in printer languages has no place in the modern enterprise.

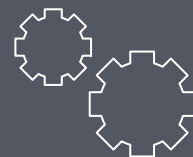

NiceWatch Enterprise Business Connector includes a graphical designer which allows the user to quickly and efficiently perform layout changes or create new labels.

SAP CERTIFIED INTERFACE

SAP-run enterprises demand that all their business processes run from their powerful ERP platform.

NiceWatch Enterprise Business Connector is a SAP certified solution that communicates with SAP and the printers in their native languages.

PRINTER INDEPENDENT

Printer brands and models use various interfaces and languages.

NiceWatch Enterprise Business Connector connects directly to over 1800 thermal printer models, as well as works tirelessly to support newly developed thermal and other printers as soon as they're released on the market.
