Enhanced version of NiceLabel Software available for download

Now supporting the Gen2 RFID standards, Oracle XML format and the latest Windows CE 5.0 platform

Slovenia, June 13, 2006 – Euro Plus, a leading supplier of printing software for the Automatic Identification and Data Collection industry (AIDC), is proud to announce the release of NiceLabel version 4.1, The Professional Labeling Software.

“One of our policies regarding NiceLabel is that we must always support all the latest standards in AIDC industry and that’s why we are issuing a new version” said Matej Kosmrj, NiceLabel product manager. “We’re now able to support also the latest RFID UHF Gen2 standard among other industry standards that are already available in NiceLabel. The EPCglobal UHF Gen2 protocol is a consensus standard that was built by more than 60 of the world’s leading technology companies. Since its initial ratification in December 2004, the EPCglobal Gen2 standard has proven to be the cornerstone of technology development and it’s simply a must have functionality for the future projects.”

One of the most important enhancements can be found in already very extensive integration middleware module called NiceWatch, a part of NiceLabel Suite, and that’s full support for Oracle XML format. Label printing from Oracle applications is now a simple task!

“Mobile devices are gaining on their importance and that’s why we’re putting a lot effort into providing mobile label printing functionalities to our customers” proudly stated Andrej Zrimsek, head of NiceLabel R&D. “All mobile functionalities are gathered in Pocket NiceLabel, a NiceLabel Suite module that supports all Pocket PC and MS Windows CE platforms (also 5.0) and uses MS Active Sync 4.1. synchronization software to collect data from various sources.”

As usual, a new version of NiceLabel will be accompanied with a new range of NiceDrivers, true Windows printer drivers. NiceDrivers are supporting for more than 1200 printer models and they can be downloaded free of charge at www.nicelabel.com.

All these reasons explain why many NiceLabel users are industry leaders.

For more detailed information on NiceLabel 4 please visit www.nicelabel.com.

About NiceLabel

NiceLabel is a family of professional labeling software products that provide a complete bar code printing solution to desktop and enterprise users. It is available in three editions: Express, Pro and Suite. NiceLabel is translated in 25 different languages. Its power is unleashed in combination with over 1200 true Windows thermal printer drivers. Thoughtfully designed user interface, rich integration options and unique data-entry application provide the quickest and most productive label design and printing possibilities. For more details, please visit the NiceLabel web site at <http://www.nicelabel.com>.
