

HEALTHCARE SAMPLE

Printing patient wristbands and histology labels

Increasing pressures to cut costs, doctor and nurse shortages, and high service demands from patients are creating a substantial need for error-free data capture and management. NiceLabel provides the technology you need to cut down on paperwork and human error, so that you can focus your time and resources where they are needed the most - patients.

NiceLabel allows you to meet the particular needs of clinicians, nurses and IT managers. NiceLabel Healthcare samples present customized applications with a personalized data entry screen which offers patient safety and identification.

In the NiceLabel Healthcare sample, one can find three different NiceForm custom applications which help you simplify data input and reduce error rates in data processing and document printing. Run the main menu "Healthcare_MainMenu.xff" form and you will be able to select the following forms:

1. Printing wristbands
2. Printing wristbands with photos
3. Printing histology labels

A NiceForm custom interface is easy to create, deploy and use. Caregivers use a simple and predefined user interface that simplifies data input and reduces errors in data processing and wristband printing.
