

Prerequisites

The sample files require an installation of NiceLabel Suite 5.2. The software does not need to be licenced; it can also run in Demo mode.

NiceLabel Suite 5.2 is available at: <http://www.nicelabel.com/Downloads/NiceLabel-Suite>

Installation Guide: http://ftp.nicelabel.com/docs/installation%20guide/ig-Installation_Guide.pdf

Unzip the compressed file to your hard disk. We recommend that you preserve the sub-folder structure:

C:\NiceLabel Solutions\...\Labels\..

C:\NiceLabel Solutions\...\Forms\..

C:\NiceLabel Solutions\...\Database\..

C:\NiceLabel Solutions\...\Graphics\..

Labels

Label files are saved in the Labels folder. You can open the *.lbl file with NiceLabel Pro and see the label format structure.

Custom forms

Form files offer a custom created interfaces for user-friendly entering of label data and printing labels. Form files (*.xff) are saved in the Forms folder.

Run the form in the user (run) mode

To run the form in the user mode, simply double click on the form file. You will be able to preview the application and print labels on the simplest way.

Run the form in the design mode

If you want to see how the form is created, run NiceForm application (Start/Programs/NiceLabel 5/NiceForm) and open the *.xff file. The file will open in the design mode and you will be able to preview the form structure.

You can also use a shortcut: simply click on the button  and the form will run in the design mode.
